Education

Vellore Institute of Technology

Bachelor of Technology - Computer Science Engineering CGPA: 9.02

Vellore, India

2022 - 2026

SKILLS

- **Frontend:** React.js, HTML, CSS, JavaScript, Tailwind, Bootstrap, Framer Motion
- **Backend:** Node.js, Express.js, Firebase, Socket.io
- **Database:** MongoDB, Firebase (Firestore)
- **Soft Skills:** Leadership, Analytical Thinking, Communication, Collaboration, Presentation Skills
- **Dev Tools:** Postman, VSCode, MongoDB Compass, Figma
- **Programming Languages:** Java, C++, Python

Projects

Moviemate

MongoDB, Express.js, React.js, Node.js, Flask, Scikit-learn, Pandas, TF-IDF

[Github Link](#) — [Live Site](#)

- Engineered a movie discovery platform with interactive access to 1.1M+ movies via **TMDB API**, user authentication, and responsive UI; applied **in-memory caching** to minimize redundant calls, cutting latency and API quota usage.
- Integrated a scalable **movie recommender system** trained on 1.2M+ movie records using TF-IDF and cosine similarity, deployed via Hugging Face Inference API for real-time recommendations.
- Architected a **secure backend** with Express.js, JWT, and MongoDB for authentication and watchlists; optimized queries and API flow to ensure **24/7 uptime** and efficient handling of concurrent requests.

Planorama

React.js, Tailwind CSS, Firebase, OpenAI API (Groq), Git

[Github Link](#) — [Live Site](#)

- Integrated an **AI-powered itinerary generator** built by a teammate, along with developing a **personalized dashboard** and **personalized chatbot** with persistent conversation history via FastAPI, enabling tailored travel planning for 30+ users.
- Designed and implemented a suite of **4 interactive travel tools** — trip countdowns, budget tracker, phrasebook, and currency converter - enhancing user engagement and planning efficiency.

SilentBridge

React.js, Tailwind CSS, FastAPI, MediaPipe, WebSpeech API, Git

[Github Link](#) — [Live Site](#)

- Engineered a **voice-to-sign module** using the Web Speech API and a Groq AI model, dynamically rendering over **1000+** ISL videos from a MongoDB-Cloudinary database to enhance accessibility.
- Collaborated a real-time **sign-to-speech system** utilizing MediaPipe to capture and classify hand gestures, providing instant voice output for **over 20 self-trained gestures**, enabling two-way communication.
- Implemented an **admin-controlled** video and gesture management system, allowing for dataset expansion via a user-friendly interface that captures and stores new gestures or word and its video URL mappings, streamlining the content update process.

Experience

KalkiFi

Jun. 2025 – Jul. 2025

Internship – Full-Stack Developer

[Certificate](#)

- Developed and integrated **blog posting** and user authentication features using **Firebase Firestore** and Google Sign-In for the main Kalkini website.
- Engineered a real-time **mentorship session booking system** supporting 4 mentors with 3 slots each using Firestore subcollections slot allocation, and state-based updates.

Rev Mechanics Team at VIT

Dec. 2024 – Present

Member – Web Developer

[Live Site](#)

- Developed a React-based **portfolio website** for TEAM Rev Mechanics within 7 days, showcasing projects and board members.
- Recognized for exceptional delivery, inducted as a **TEAM member**, and featured in official LinkedIn/Instagram posts.

Achievements

- Maintained a CGPA of 9+, demonstrating dedication, discipline, and strong academic performance.
- Earned [Microsoft Certified : Azure AI Fundamentals](#) certification, validating cloud computing expertise.
- Solved 250+ Data Structures & Algorithms problems on [Leetcode](#), strengthening problem-solving skills.
- Secured **Rank 1** in the International Olympiad of Mathematics (IOM), highlighting early academic excellence.
